

numaXPIANO

QUICK GUIDE

The **Numa X Piano** represents a real revolution for digital piano players: unlimited hi-end features and sounds have been organized to be simply controlled through **UX logic**, our innovative adaptive color user interface.

UXlogic

So, just plug and let your fingers go. The combination of brand new physical modeling technologies and the newest evolution of FATAR hammer action keyboards is designed for the best acoustic and electric piano experience. And you will be surprized how fast and natural it is to manage all functions. **Bring color to your music and play. Like never before.**
